EDUCATION

Dr. Mahalingam College of Engineering and Technology Pollachi, Tamil Nadu
B.E in Computer Science and Engineering (Artificial Intelligence and Machine Learning)
Expected Graduation: June 2028
GPA: 7.9/10

SKILLS

Programming: Java, Python, C, JavaScript, HTML/CSS, SQL, PHP

Tools: Git, N8N, Nmap, Gobuster, Copilot

General: Prompt Engineering, Solution Planning, AI-assisted development

EXPERIENCE

Machine Learning Intern (Remote)–CODTECH IT Solutions Duration: 1 Month (Aug 2025)

- Worked on foundational machine learning tasks including regression and classification.
- Applied supervised learning concepts to practical datasets.
- Strengthened understanding of model evaluation and data preprocessing techniques.

Cyber Security Intern (Remote)– SmartED Innovations Duration: 1 Month (Dec 2025)

- Completed my Cyber Security Internship, where I gained in-depth exposure to theoretical concepts such as security fundamentals, threats, and best practices.
- This internship strengthened my conceptual understanding and prepared me to move into practical implementation next.

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification – DeepLearning.AI
- Cyber Security & Ethical Hacking for Beginners – GUVI

PROJECTS

FastAPI Document Converter January 2026

- A secure, self-hosted document file converter built with FastAPI and LibreOffice.
- Converts documents between formats (PDF, DOCX, ODT, TXT, HTML).
- GitHub: <https://github.com/ssubaz/convertio>

JSON to TOON Converter March 2026

- Developed a Python-based utility to convert JSON data into TOON (Token-Oriented Object Notation), reducing token usage for LLM workflows and improving prompt efficiency.
- Implemented JSON parsing, data transformation, and command-line functionality for AI and developer use cases.
- GitHub: <https://github.com/ssubaz/json-to-toon>

Wordlist Generator June 2026

- Developed a wordlist generation tool for cybersecurity and CTF applications. Features customizable word combinations and automated wordlist creation for password auditing and security testing.
- GitHub: <https://github.com/ssubaz/wordlist>
